#### ABSTRACT

O'Neill, S.F., M. Bernard and J. Singer. 1986. 1985 Atlantic salmon sport catch statistics, Maritime Provinces. Can. Data Rep. Fish. Aquat. Sci. No. 600. v + 71 p.

The Maritime Provinces Atlantic salmon sport catch in 1985 was 48,560 fish - 32,620 grilse retained, 1,320 grilse released, and 14,620 large salmon ( $> 63$  cm fork length) released. Field staff estimated that 37 New Brunswick rivers produced 26,850 bright fish (20,230 grilse retained) and 5,460 kelts. Nova Scotia anglers reported fishing on 96 rivers and retained or released a total of 16,200 large salmon and grilse. Only 47 grilse were angled on Prince Edward Island. Anglers spent 94,400 rod-days on New Brunswick rivers and 64,900 on Nova Scotia rivers during the 1985 season. Catch per unit effort (fish per rod-day) for the Maritimes was 0.305, which represents a considerable improvement over the 1984 success rate of 0.210.

Keywords: Atlantic salmon, sport catch, rod-days, kelts, grilse, large salmon, New Brunswick, Nova Scotia, Maritimes.

#### RÉSUMÉ

O'Neill, S.F., M. Bernard and J. Singer. 1986. 1985 Atlantic salmon sport catch statistics, Maritime Provinces. Can. Data Rep. Fish. Aquat. Sci. No. 600. v + 71 p.

Les prises sportives de saumon de l'Atlantique effectuées dans les provinces Maritimes en 1985 s'établissent à 48 560 saumons, soit 32 620 madeleineaux capturés et gardés, 1 320 madeleineaux remis à l'eau et 14 620 gros saumons (plus de 63 cm de longueur à la fourche) remis à l'eau. Les employés des régions concernées ont estimé à 26 850 saumons de montée (20 230 madeleineaux gardés) et 5 460 charognards les prises obtenues dans 37 rivières du Nouveau-Brunswick. En Nouvelle-Écosse, les prises sportives de saumon, soit gardées soit remises à l'eau, obtenues dans 96 rivières s'élèvent à 16 200 gros saumons et madeleineaux. À l'Île-du-Prince-Édouard, les prises se sont limitées à 47 madeleineaux. En 1985, les pêcheurs ont consacré à la pêche 94 400 journées au Nouveau-Brunswick et 64 900 en Nouvelle-Écosse. La prise par effort unitaire (poissons par journée de pêche) pour les Maritimes a été de 0.305, ce qui représente une nette augmentation par rapport à la prise unitaire de 1984 (0.210).

## INTRODUCTION

This report provides catch and effort statistics for the recreational Atlantic salmon fishery in the Maritime Provinces. Similar reports, known as the "Redbook" series, document salmon angling statistics for the years 1970-83. The series was discontinued in 1984 and replaced with the current data report format.

The statistics provided in this report come from two sources, so have been presented accordingly. Data on New Brunswick and Prince Edward Island rivers and streams were collected by Fisheries and Oceans and New Brunswick Department of Forests, Mines, and Energy field personnel. Catch and effort information on Nova Scotia's waterways was compiled from reports supplied by over 5,500 Nova Scotia salmon anglers.

## MARITIME PROVINCES

In 1984, a regulation was introduced which required that salmon 63 cm or more in fork-length be released. The regulation remained in effect for 1985, throughout the Maritime Provinces. As a result, staff who collect catch statistics in New Brunswick and Prince Edward Island were unable to accurately estimate the number of fish released on many rivers so statistics on rivers from those provinces will not reflect the true size of the catch. Comparison of catch figures compiled in 1984 and 1985 with those of previous years should be made with caution (Tables 1, 2, and 3).

In 1985, Maritime Atlantic salmon sport-fishermen angled 32,600 grilse (Table 2). This number is only slightly less than the previous 15-year (1970-84) mean catch of 36,900 large salmon and grilse. Anglers throughout the Maritime Provinces reported fair to excellent fishing with only a few exceptions. The number of large fish released also exceeded expectations on many systems (Table 6, Tables 11-19). The proportion of catch accounted for by each province remained virtually the same as in 1984: New Brunswick anglers reportedly accounted for 74% of the Maritime catch and Nova Scotian's, 26%. Prince Edward Island sports fishermen retained only a few fish in 1985 (< 1%).

Maritime rivers which drain into the Gulf of St. Lawrence collectively yielded nearly 20,000 grilse during the 1985 season. The Scotia-Fundy Region, although comprised of more rivers than the Gulf, yielded fewer fish at nearly 13,000 (Table 4).

Angling pressure increased in 1985 over 1984 levels, from 134,000 to over 160,000 rod-days Maritime wide. Although the increase from 1984 levels is perhaps noteworthy, comparison of 1985 angler effort with the mean effort over the previous 15 years (1970-84) of 128,000 rod-days reveals the extent of the increase over historical levels (Table 5).

A map of the Maritime provinces showing Atlantic salmon rivers and a list of rivers by salmon fishing areas is given in Appendix 1.

#### New Brunswick

The 1985 New Brunswick Atlantic salmon retained catch was 24,042 grilse. An additional 8,271 large salmon were estimated released (Table 6). The release figures are complete on only a few New Brunswick rivers so the provincial total should actually be higher than estimates indicate. Historical catch records collected by Fisheries and Oceans field staff show a great degree of variability in salmon catch in New Brunswick since 1951, from a low of 16,263 fish in 1983 to a high of 85,935 in 1966. The 1985 retained and released total of roughly 32,300 large salmon and grilse, in spite of being incomplete, is only slightly below the 1951-84 mean catch of 38,800 fish.

The New Brunswick Atlantic salmon sport fishing season is comprised of two components, the kelt (black) and bright fisheries. Kelts are salmon which are in the spent or spawned-out condition prior to their re-entry into salt water (Allan and Ritter 1977) and a bright fish is a maturing salmon that has spent at least one winter at sea. New Brunswick anglers

retained roughly 3,800 kelts and 20,200 bright fish in 1985 (Table 2).

Angler effort displayed a sharp increase in 1985 over the previous two years, and catch per rod-day was the highest it has been since 1981 (Table 5). Thirty-seven rivers had reported effort in 1985, up slightly from the thirty-four rivers visited by salmon fishermen in 1984.

The kelt salmon fishing season generally produced the best success rates during 1985 but tributaries of the Restigouche and Miramichi system again provided the best bright fish angling. The Sevogle and Upsilonquatch rivers exhibited catch rates of 0.946 and 0.695 fish per rod-day, respectively.

Open season dates for 1985 are given in Table 7; variation orders and special seasons are listed in Table 8.

New Brunswick and Prince Edward Island rivers are listed alphabetically in the

TABLE 5. Angling effort (rod-days) and catch per unit effort (CPUE) for the Maritime Provinces, by year of catch, 1970-85.

Year	Maritimes		Nova Scotia		New Brunswick		Prince Edward Island

statistical section. The data for each river include the number and weight of kelt and bright grilse, by month, effort in rod-days, and the catch per rod-day.

As mentioned above, all details available on the release of large salmon are provided in Table 6. Large salmon release figures have not been included in the river summaries which follow, as the data are incomplete.

In addition to the individual river data, several river groupings are also provided, for summary purposes. They include summaries by major river system, Fisheries and Oceans statistical district, county, salmon fishing area (previously referred to as salmon management zone), and province.

TABLE 8. New Brunswick and Prince Edward Island variation orders, fishing prohibitions and special seasons, 1985.

Alma River	Closed to angling from October 1, 1985, to the end of the season.
Bartholomew River	Closed to angling in 1985.
Big Salmon River	Closed to angling from August 16 to October 15, 1985.
Hammond River	(1) Closed to angling in Palmer Brook from its confluence with the Hammond River upstream 200 m to a point as marked by a fishery officer on August 15, 1985, for the remainder of the year. (2) Closed to angling upstream from a point marked by a fishery officer at the head of Porter Pool from October 1 to October 15, 1985.
Kennebecasis River	Closed to angling from October 1 to October 15, 1985.
Midgell River (Prince Edward Island)	Catch and release "only" season from October 1 to October 31, 1985.
Morell River (Prince Edward Island)	Catch and release "only" season from October 1 to October 31, 1985.
Nashwaak River	(1) Closed to angling in those waters known as Big Basin Pool, and lying between a sign placed by a fishery officer at the downstream end of the Pool and a sign placed by a fishery officer at the upstream end of the Pool on April 29, 1985, for the remainder of the year. (2) Closed to fishing in that portion locally referred to as Ross Pool or High Bank Pool, lying between an upstream and downstream marker placed by a fishery officer on July 10, 1985, for the remainder of the year.
Nepisiguit River	(1) Closed to angling in those waters from the head of Pabineau Falls Pool downstream for a distance of 45 m to a point as marked by a fishery officer from June 1 to December 31, 1985. (2) Closed to angling in those waters from 100 m above to 100 m below the Nepisiguit Trap Counting Fence from May 31 to December 31, 1985.
Nerepis River	(1) Closed to angling upstream from a point marked by a fishery officer at the head of Salmon Rock Pool from October 1 to October 15, 1985. (2) Season extended to October 31, 1985, in those waters downstream from a point marked by a fishery officer at the head of Salmon Rock Pool.
Point Wolfe River	Closed to angling in 1985.
Pollett River	Closed to angling from August 23 to October 15, 1985.
St. Croix River	Daily and yearly catch limits for salmon are varied to be one salmon in any one day and five salmon in any year.
Saint John River	Closed to angling in those waters of Carleton County, lying between the highway bridge at Grafton and the railroad bridge at Upper Woodstock from April 29, 1985, for the remainder of the year.
Southwest Miramichi River	Closed to angling in those waters lying between the No. 8 Highway Bridge and the Canadian National Railway Bridge at Doaktown, Northumberland County, from August 14 to December 31, 1985.
Tabusintac River	Season extended to October 27, 1985.

### NOVA SCOTIA

The 1985 Atlantic salmon sport catch in Nova Scotia was over 16,100 fish. Anglers retained roughly 8,500 grilse and released an additional 1,300 grilse and 6,300 large salmon. The number of fish angled is the highest ever recorded for the province. The closest comparable catch occurred in 1981, when an estimated 10,200 large salmon and grilse were angled. Direct comparison of 1984 and 1985 Nova Scotia catch and effort figures with those of earlier years should be cautioned against. Catch and effort reports prior to 1984 were based on Fisheries and Oceans field officer estimates. In 1984 and 1985, however, catch and effort data were provided by individual anglers on cards supplied with their license. In 1984, 5,168 anglers (roughly 90% of those licensed) provided catch/effort reports and in 1985, a similar percentage of anglers responded (5,533 out of 6,101 licensed).

License sales increased to 6,101 in 1985 from 5,787 in 1984. In 1983, the first year Atlantic salmon anglers were required to purchase a separate license, 7,598 licenses were sold. License sales exhibited a similar trend in New Brunswick during the last three years, with a sharp drop in the number of salmon fishermen in 1984 and an increase for the 1985 season.

The proportion of residents and non-residents who fished in Nova Scotia in 1985 remained the same as in 1984, when 11% of fishermen came from outside the province. Ninety-two rivers were fished in Nova Scotia for Atlantic salmon during the season for an estimated 65,000 rod-days (Table 5). On average, each angler that fished spent 13 days seeking Salmo salar. Surprisingly, 17% of anglers who sent in reports claimed they did not fish in 1985.

Several separate tables are provided in the Nova Scotia section of this report which give details on each river reportedly fished in Nova Scotia. The format and content of the tables are distinct from those provided for New Brunswick and Prince Edward Island. In general, data in the Nova Scotia section are compiled either by individual river (Tables 11, 15, and 19), by district (Tables 12 and 16), county (Tables 13 and 17) or fishing area (Tables 14 and 18). Data in the tables numbered 11 through 14 provide catch information broken down into retained and released components; Tables 15 through 18 summarize total catch and effort and catch per unit effort. Table 19 is a monthly breakdown of retained catch by river.

Open-season dates accompany each river in the Nova Scotia section tables but variation orders and special seasons are listed in Table 9.

Estimates of catch and effort for anglers who failed to return license stubs were made by either a "regression" or "ratio" method, depending on the river. A description of the methodology is provided in Appendix 2.

The Cheticamp River is managed under the National Parks Act and Regulations which do not require that anglers have a provincial fishing license. Catch information provided on the Cheticamp by anglers is therefore incomplete and should not be referred to in the N.S. data tables. National park wardens from the Cape Breton Highlands National Park were kind enough to supply us with their estimates of catch and effort which are summarized in Table 10.

TABLE 9. Nova Scotia variation orders, fishing prohibitions and special seasons, 1985.

Cheticamp River	Season regulated by Parks Canada: May 18 to September 30, 1985. Refer to page 10 for catch and effort data.
Clyde River	Reopened to angling from August 8 to August 31, 1985, downstream from Quinn's Falls.
East River, Sheet Harbour	Closed to fishing in those waters upstream from the No. 7 Highway Bridge to the Fisheries and Oceans barrier dam from June 15 to September 30, 1985.
Gold River	Closed to fishing in that portion of the river known locally as the "Dipping Pool", located between the "Cable Pool" and the "Kill Devil Pool", as marked by a fishery officer, from May 10 to July 31, 1985.
Grand River	(1) Closed to fishing between those points as marked by a fishery officer being approximately 90 m upstream and 90 m downstream from Grand River Falls from May 10 to October 15, 1985.  (2) Closed to fishing in those waters upstream from the highway bridge at Grand River to Morrison's Bridge at Loch Lomond Lake from August 23 to September 3, 1985.
Inhabitants River	Salmon season close time extended to October 29, 1985.
Kirby River	Closed to fishing in those waters 50 feet downstream and 50 feet upstream from the #430 highway bridge at Sheet Harbour Passage from June 15 to September 30, 1985.
LaHave River	Closed to fishing in the pool located immediately below Morgan Falls Fishway, as marked by a fishery officer, from May 10 to December 31, 1985.
Margaree River	(1) Those waters, except upstream from the Big Intervale Bridges: Season - June 1 - October 15, 1985.  (2) Those waters upstream from the Big Intervale Bridges: Closed all year.
Medway River	(1) Closed to fishing in that portion from a location marked by a fishery officer above the Westfield Highway Bridge, upstream to the foot of McGowan Lake from May 10 to December 31, 1985.  (2) Closed to salmon angling in that portion upstream from the foot of McGowan Lake, including all branches and tributaries, from May 10 to December 31, 1985.
Mersey River	Salmon season close time extended to August 14, 1985.
North River (Victoria Co.)	(1) Closed to fishing from June 18, 1985, for the remainder of the year in those waters as marked by a fishery officer: (a) The waters of the the Pot Hole lying immediately below Little Falls and downstream for a distance of approximately 7.6 m; (b) The waters of the Pot Hole lying immediately below Twin Falls and downstream for a distance of approximately 9.1 m; (c) The waters lying immediately below Big Falls and downstream for a distance of approximately 22.8 m.

TABLE 9. (continued)

	(2) Closed to fishing in that portion upstream from the highway bridge at North River Bridge from August 30 to September 3, 1985.
St. Mary's River	<p>(1) Those waters downstream from a point 100 m upstream of Silver's Bridge and downstream from the highway bridge at Glenelg: Season - May 18 - August 29, 1985.</p> <p>(2) East River, St. Mary's, upstream from a point 100 m upstream of Silver's Bridge: Season - May 18 - August 14, 1985.</p> <p>(3) West River, St. Mary's, upstream from the highway bridge at Glenelg: Season - June 1 - August 14, 1985.</p> <p>(4) Closed to fishing in those waters as described below, from July 31 to August 1, 1985:</p> <p>(a) West River, St. Mary's, upstream from the highway bridge at Glenelg to the Guysborough County line;</p> <p>(b) The waters of East River, St. Mary's, upstream from a point 100 m upstream of Silver's Bridge to the Guysborough County line;</p> <p>(c) The waters of Archibald's Pool, at Stillwater, as marked by a fishery officer.</p>
Salmon River (Guysborough Co.)	Closed to fishing in those waters from Spanks Bridge upstream to Salmon River Lake, but not including the tributaries, from July 31 to August 28, 1985.
Tusket River	Closed to fishing from the highway bridge at the southern extremity of Lake Vaughn downstream to the Tusket River Hydro Station from April 1 to June 30, 1985.
West River (Sheet Harbour)	Closed to fishing in those waters upstream from the Killag Road Bridge to its source, and including all tributaries, from June 15 to September 30, 1985.

TABLE 10. Estimated number of salmon and grilse angled on Cheticamp River, 1985.

Month	Salmon (Released)	Grilse (Retained)	Rod days
May	0	0	2
June	41	1	164
July	11	7	192
August	6	8	111
September	21	6	47
Total	79	22	516

## ACKNOWLEDGEMENT

The data presented in this report would not have been available without the efforts of Fisheries and Oceans operations staff and New Brunswick Department of Forest, Mines, and Energy regional biologists and field staff. Their assistance is greatly appreciated. The Nova Scotia Department of Lands and Forests was instrumental in the smooth running of our data compilation on Nova Scotia rivers by organizing and overseeing license sales and the collection of angler information. Their cooperation and assistance rendered our task manageable and enjoyable. Lastly, but certainly not least, the support of Nova Scotia's many conscientious salmon anglers must be applauded. The detailed information on Nova Scotia's many salmon streams would not exist without their cooperation.

17 Prince Edward Island	Morell, West (Queens Co.), Midgell.
18 Gulf Shore Nova Scotia	Shinimikas, Tidnish, River Philip, Wallace, Pugwash, French, Waugh, River John, West (Pictou Co.), Middle (Pictou Co.), Barney's, East (Pictou Co.), West (Antigonish Co.), South (Antigonish Co.), Pomquet, Mabou, Margaree, Cheticamp.
<u>Scotia-Fundy Region</u>	
23 Saint John	Tantramar, Demoiselle Creek, Crooked Creek, Shepody, West (Albert Co.), Alma, Point Wolfe, Coverdale, Turtle Creek, Weldon Creek, Pollett, Petitcodiac, Big Salmon, Irish, Mosher (Saint John Co.), Black (Saint John Co.), Hammond, Little (Saint John Co.), Kennebecasis, Saint John, Nerepis, New, Pocologan, Magaguadavic, Digdeguash, Waweg, St. Croix, Canaan, Oromocto, Salmon (Queens Co.), Nashwaak, Keswick, Tobique, Salmon (Victoria Co.).
19 Cape Breton East	North Aspy, Ingonish, Indian Brook, Barachois, North (Victoria Co.), Baddeck, Aconi Brook, Middle (Victoria Co.), Mira, Lorraine Brook, Catalone, Gerratt Brook, Salmon (Cape Breton Co.), Gaspereau (Cape Breton Co.), Framboise, Marie Joseph, Grand, River Tiffard, Inhabitants.
20 Eastern Shore Nova Scotia	Clam Harbour, Guysborough, Salmon (Guysborough Co.), Cole Harbour, Larry's, New Harbour, Isaac's Harbour, Country Harbour, Gegogan Brook, Indian, St. Mary's, Gaspereau Brook, Liscomb, Necum Teuch, Ecum Secum, Moser (Halifax Co.), Quoddy, Salmon (Port Dufferin), West (Sheet Harbour), Taylor Bay Brook, East (Sheet Harbour), Kirby, Tangier, Ship Harbour, Salmon (Halifax Co.), Musquodoboit, Chezzetcook, Three Fathom Harbour Brook, Rocky Run, Lawrencetown Lake (Salmon River), Little Salmon (Lake Major), Sackville.
22 Upper Bay of Fundy	Bear, Lequille, Paradise, Round Hill, Annapolis, Nictaux, Cornwallis, Gaspereau (Kings Co.), St. Croix (Hants Co.), Kennetcook, Shubenacadie, Stewiacke, Salmon (Colchester Co.), North (Colchester Co.), Chignecto, Debert, Folly, Great Village, Portapique, Bass (Colchester Co.), Little Bass, Economy, Harrington, Diligent, Apple, River Hebert, Macan, Nappan (Cumberland Co.).
21 Southwest Nova Scotia	Nine Mile, Ingram, East (Lunenburg Co.), Middle (Lunenburg Co.), Gold, Martins Brook, Mushamush, LaHave, Petite Riviere, Medway, Mersey, Broad, Sable, Jordan, Roseway, Clyde, Barrington, Tusket, Salmon (Digby Co.), Sissiboo.

Appendix 2  
Calculation of catch and effort estimates

Nova Scotia salmon anglers are required to complete and return catch and effort cards, which are attached to their licenses. Some cards are returned without prompting, but up to three reminder letters are sent to prompt non-respondents. As a result, cards are identified as belonging to one of four response categories: voluntary, post-prompt 1, post-prompt 2, or post-prompt 3. In spite of the numerous prompts, however, overall response was somewhat less than 100% in 1985. Consequently, catch and effort by non-respondents had to be calculated.

The extrapolation of reported data to account for non-response was accomplished using a three step process: (1) estimating the additional province-wide effort expended by non-respondents, (2) proportioning that effort across all rivers according to the effort observed on those rivers, and (3) estimating the total catch on each river by regressing catch on effort and determining total catch at an effort level which incorporates the estimate of unreported effort. Alternatively, if effort information was insufficient, catches were calculated by using a modified ratio method (see 3(b)).

Mathematical representation of the three steps.

1.  $\ln \text{Cum effort per response category}$  is regressed on  $\ln \text{Cum returns per response category}$  so that  $\ln \text{Cum } E = a + b \ln \text{Cum } X$ . Cum E and Cum X refer to cumulative effort and returns, respectively. The equation is solved for X equal to the total number of licenses sold in the province.

i.e.,  $\ln \hat{E} = a + b \ln (Total \text{ license sales})$  where  $\hat{E}$  is the estimated total effort.

The estimated unreported effort ( $\hat{E}_u$ ) is found by subtracting the overall total reported or observed effort (E), regardless of category, from the estimated total effort ( $\hat{E}$ ):

$$\hat{E}_u = \hat{E} - E$$

2. For river i, estimated total effort ( $\hat{E}_i$ ) is calculated as follows:

$$\hat{E}_i = \frac{\hat{E}_u \times e_i + e_i}{E}$$

where  $e_i$  is reported effort on river i.

3.(a) For river i, total estimated catch ( $\hat{C}_i$ ) is arrived at by regressing cumulative catch (Cum  $c_i$ ) on cumulative effort (Cum  $e_i$ ) for river i for the four categories, so that:

$$\ln \text{Cum } c_i = a' + b' \ln \text{Cum } e_i$$

The equation is solved for Cum  $e_i$  equal to  $\hat{e}_i$ , the total estimated effort on that river.

$$\text{i.e., } \ln \hat{C}_i = a' + b' \ln \hat{e}_i$$

(b) On some rivers, however, cumulative catch can not be regressed on cumulative effort due to the small number of anglers who reported fishing on those rivers. In such instances where there is no reported effort on a particular river for a response category, the estimate of total catch is calculated by a ratio method, as follows:

An estimate of total provincial catch ( $\hat{C}$ ) is determined by regression as described in 1 to 3(a) above. The ratio of estimated catch ( $\hat{C}$ ) to observed provincial catch (C) is then applied to the observed catch for each river ( $c_i$ ) on which effort data for the four categories is incomplete.

$$\hat{C}_i = \frac{\hat{C}}{C} \times c_i$$

where  $\hat{C}_i$  is estimated catch for river i.
